

Name _____

Independent variable you are testing:

Dependent variable measured:

Design a data table to record your results Use this checklist to help.

- Use a descriptive title that tells what is recorded in the table.

Data Table is not descriptive. Use a title like **Effect of Temperature on Maximum Larva Length.**

- Use metric or other precise units for all measurements.
- Make it clear what kind of information is recorded in the table.
- Have a place to record an average of the trials.
- Compare control and experiment data on the same table
